

Aldi,

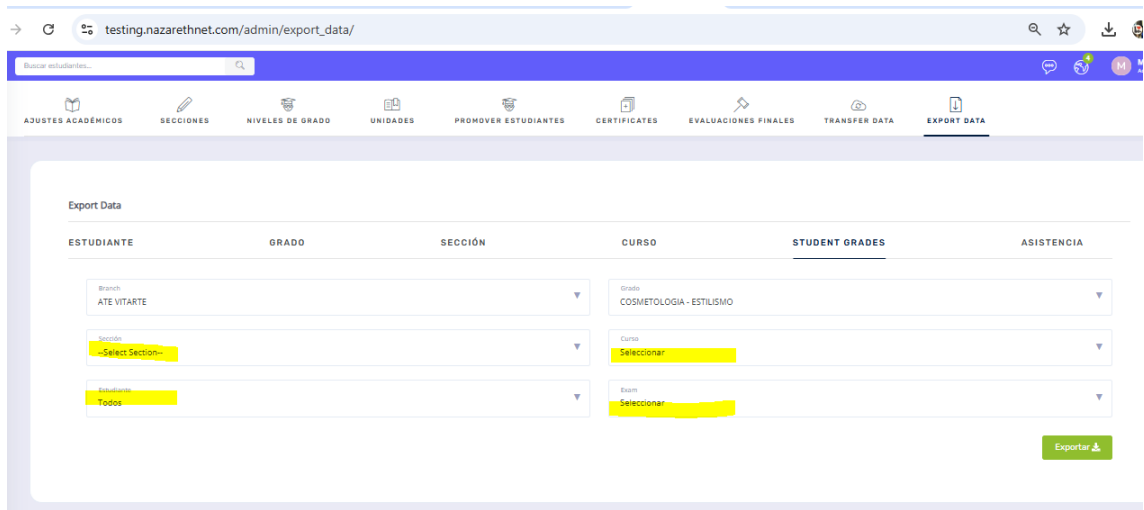

1. I can't change the certificate, although I was able to last time. It seems something has moved. I have set the sheet size in cm and also in pixels and it does not allow me to upload it.

2. A link When I click here, the next page to appear should only show the data in the table.

3. You have the option to download all course information without prior selection.

4.1. If the course already exists, it already has activities.

ROOM A: COURSE A

ROOM B: COURSE A

Both classrooms already exist and already have activities, assignments, and tests created.

Example: I have a student, Sarai, who is in **ROOM A**, and I'm going to transfer her to **ROOM B**. She must transfer without the activities because that room already has the activities created.

I understand that it's not possible to transfer with the grades; honestly, that would be ideal.

Actually, I don't think it's very useful if, when we duplicate the course, all the information is duplicated, and I can manually activate it in room B and enter the grades manually.

There's no way to transfer her with the grades already prepared. If you take the time, it doesn't matter, I'd work with what we have now for the time being.
