22	ERROR MESSAGE APPEARS WHEN CREATING THE REPORT	DONE
23	STUDENT DATA - OK Export student grades and attendance with date ranges should be added	DONE
24	Only the grades (activities, exams, assignments) and attendance of the selected student should be transferred. With the duplicate feature, I can duplicate the same activities, assignments, forums, etc. from a course and quickly create a new course with this feature. However, with the transfer feature, I want the student to move from the same course to another section with the same grades they had in the previous section. It would no longer be necessary to select the Trans exam, Trans activities, etc. functions. EXAMPLE: Carlos is studying Computer Science in section X, but he is being transferred to Computer Science in section Y. In both sections, they have the same activities; all that's needed is for their grades to be transferred to the new section. http://testing.nazarethnet.com/admin/transfer_data/	we cannot directly transfer the grades into the new section's existing activities because each activity in the system has a unique ID. When we transfer a student, the grades are linked to the old activity IDs. If we try to match them with the new section's existing activities, it can cause data conflicts or wrong results. To keep the data clean and safe, we avoid doing this. That's why the system needs to copy the same activities when transferring a student — so the grades match perfectly without any risk.
